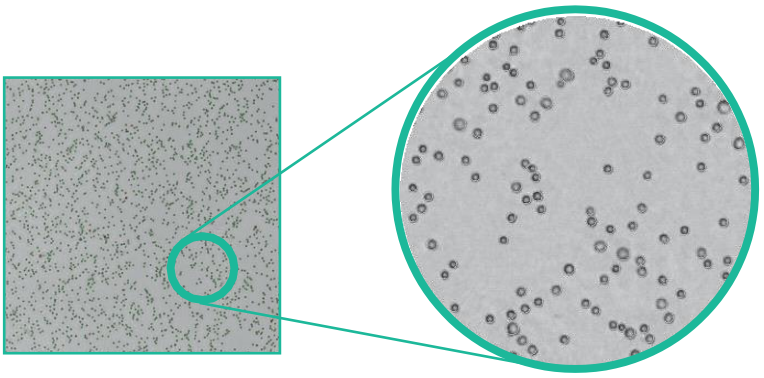
IPRASENSE reinvents the automated Cell Counter and Viability Analyzers. Our unique label-free Imaging Technology provides extremely fast cell count and viability from a few µl sample volume of your cell suspension. The unmatched repeatability directly results from the extremely large field of view of the single analyzed image, together with the sample preparation free method (no dilution, no label like trypan blue). The NORMA XS offers fast, simple and robust solutions for your routine lab cell counts.



Several thousands of cells counted within a single image gives unmatched rapidity and repeatability
